Adobe Photoshop CS5, like its earlier versions, offers a complete package of editing tools for making changes to digital photos. Photoshop CS5 extends the post-editing capabilities of older Photoshop versions. It now supports 32-bit floating-point color for far more accurate and vivid color and tone adjustments. But with all the functions Photoshop adds to Photoshop, it also cuts some features. Cutting features is part of the learning curve for Photoshop. In fact, you need to gain the confidence to know that you don't need certain features to do your work. The vast majority of editing tasks are easily accomplished in Photoshop. But over time, you will learn which tools are essential to your work and which tools you can use or ignore. This book helps you avoid making the same mistakes I made. Photoshop has a habit of changing rapidly, so it's important for beginners to stay current on the applications and feature updates. The Photoshop Learning Channel (`www.photoshop.com/learn`), along with the Photoshop Blog (`www.photoshopblog.com`), is a good place to go to stay current on updates and new changes. ## Choosing a License for Creative Suite Photoshop has a license program that includes the following versions and three classifications of the program's applications: * Photoshop Elements * Photoshop Lightroom * Photoshop CS5 The versions of the applications covered by the license program are called _editions,_ and the versions based on the older Photoshop CS2 were called the _CS2 versions._ The program comes packaged with a _suite_ —a bundle of applications that include Photoshop, Photoshop Elements, Photoshop Lightroom, and Photoshop Fireworks. You can buy the individual application at a discounted price if you want to buy each as you want it. The four applications are not part of the same program but are sold together and bundled as one software package under the single Product. A different License applies to each version; however, all four are compatible with one another. An active subscription to the Adobe _Creative Cloud,_ a subscription that gives you access to the latest updates and new releases of Photoshop along with Elements, Lightroom, and Fireworks, may be required to access the software updates. The CS2 versions are not compatible with CS5 or later versions of Photoshop, so if you want to keep using the older versions, you have to buy them through the Download Center at `www.adobe

There are two ways to navigate through the program: the toolbox and the workspace. The toolbox is where you go when you want to learn how to use the main tools in Photoshop. It displays all of the tools in the program in a window. You can edit, crop, resize, or enhance images and graphics using these tools. Tools are organized in categories, such as color correction, cloning, healing, drawing, and other categories. The toolbox is not considered to be the most efficient way to use Photoshop because it displays the tools in alphabetical order. The workspace is where you go to create new images or edit existing ones. When you are viewing a new photo, you can choose an image from your computer, open an image from your scanner, or open an image from a folder using the Open command. You can use the Edit and Eraser tools to remove objects from your image or to create new ones. You can also adjust the brightness, contrast, and other visual properties of your image using the Transform, Crop, and Filter tools. You can retouch images and use a filter brush to edit photos. Social Media Video Kansas Derby Champion Natalie Loder (Pence), the most accomplished thoroughbred in the world that day, went on to score a sensational 52-1 upset win over Prince of Penny, the Kentucky Derby champion, in the 1 1/2-mile Snow Goose Handicap. The win was the third for Loder, the one-year-old daughter of Prince Todd and Cast from the well-regarded Northern Dancer family. She was shipped to the January meeting after winning an allowance race at Santa Anita Park. Running in the blue California colors, she was in seventh place, with a pair of fast ones still to come, when she took the lead with a quarter of the distance to go. As a favorite, she held off one challenge. Silver Spur came into the stretch in fourth place but finished third. Cast too, making only the second start in the United States for Sterling Stewart's horse, made a run at the front but faded to fifth. "I never dreamed that Loder would run that far and win," said Stewart, who owned the race. "I called at home in Michigan and got the news, and told my wife [Nancy Stewart] that Loder would be the winner. I'm proud that she did it on her first start in California. She went back to the paddock, all excited, and she's in her stall eating the heart out of her mouth."
