Product Description: MyiDi 6 provides immediate control for the most critical part of your wedding photography workflow - from the moment you hand over your camera to the moment you see your images on a screen. Easily sync and manage your images on your Windows, Mac or Linux desktop to streamline the creation of your album for online viewing or printing. Plus it offers essential tools and workflow control for developing and sharing your images. Immediate Control with MyiDi 6 The ideal workflow for today's image-conscious bride and groom. Hands-free, image-based workflow is a refreshing change from the typical method of doing wedding photography where a photographer (or gaggle of photographers) will take as many as five hundred images of the wedding couple and then must wait several weeks for the processing and printing of all the images. With MyiDi 6, the workflow is fluid and simple. Your images are automatically synced between your computer and smartphone or tablet. Whether you're at the wedding or on the way to the reception, you can access and control your images with MyiDi, then streamline your workflow to create and share your album with a simple push of a button. - Enable a seamless workflow - Be with your guests - Easy, intuitive to use interface - Edit and share albums without slowing down your system - Automatically upload photos and videos to Facebook, Instagram, or Vimeo - Automatically sync images - Automatically create images for your album - Automatically store images and movies to your iPad, Android or Windows phone - Image Capture and Camera Control - Image Sync - Image
