This product is the base package for 737 Captain (-100, -200C/F, ADV ) expansion models. Key Features: 

- Quality and realism of Captain Sim
- Improved weather...

 Aircraft manufactured after 1991 are modeled using V2.0a. Version V2.0c does not allow the inclusion of such views as, for example, radio engineering and navigation equipment in the model file, and also does not support the use of additional textures using the Bulk texture pack (BTP) system. Version V2.0b has one more difference from version V2.0c: it makes it possible to use any additions to models, including textures using the Bulk texture system
