It is what KeePass uses. A:

## What's New In MCrypter\_?

===== The audio player is a small utility that allows you to save any kind of content as MP3 file so that you can listen to them later. You can drag and drop any type of file you want and you will be given the option to use an existing file as a base or even create a new one from scratch. It will also allow you to set the file's length before saving, the duration to which it will be played, the audio quality and the Bit Rate. Features of the audio player:

===== Allows you to: - Save any file of your choice as an MP3 file - Choose the length of the playing file - Set the duration of the playing file - Set the audio quality - Set the Bit Rate - Drag and drop any type of file onto it - Play the file back at a later date - Share the file with your friends How to use it:

===== Basically, you have to right click on any type of file and choose the option "Save As MP3". After this step, you can decide how long and of what quality the file will be saved. Ensure that you set the Bit rate. If you don't know how many kilo bits per second (Kbps) are in the file, click on "Show file info" and the information will be displayed. By changing this value, you will see how far you are from the original file. Share your files on your favourite social networks, e.g. Facebook, Twitter, Email or WhatsApp. You can also do this manually by opening the app, then pressing the button "Share" on the top right corner and choosing the source file. By using the ID3 tags, you can find out every information regarding your file. Similar on YouTube: ===== If you want to increase the length of your files, you can always compress them to make them smaller and larger ones. To do this, you must right click on the file and choose Compress to MP3... Similar on YouTube: =====

"Flowney.Mobi" is a small application that lets you transfer any type of document, like text, spreadsheets, presentations, etc. to your smartphone. It is a simple utility that enables you to save your data to the mobile device without the hassle of moving it from an email or saving it on a folder on your computer. To transfer your data to the mobile device,
