watch from a variety of formats. * Download the TV shows and movies from the browser on your PC. * All of the programs are compatible with all browsers and operating systems. * You can view the program list and choose the

What's New in the?

The Portable RevoluTV is a tool, that allows you to watch TV online without a Tuner card and a Desktop Application. It can handle

several channels at once and is extremely lightweight. You can set favorite channels, create a list of channels to be skipped and manage the volume and the subtitles.

Rating: 5/5 Portable

RevoluTV is a software tool designed in order to help individuals watch one of the many Internet TV channels featured. Portable version, less information stored on PC This is the portable version of RevoluTV and therefore,

the Windows registry and Start menu/screen are not going to suffer any changes. What's more, Portable RevoluTV can be used on any computer you can connect to, by placing the program files to a removable storage device and clicking the EXE. No need to worry about the installation process, as it is not a prerequisite. Simple and lightweight interface

The interface sports a fairly simple design and consists of a plain window, which

resembles, to some extent, Windows Media Player. It contains a play/pause button, a volume bar, and a menu bar and thus, it becomes apparent it is accessible to both novice and power users. The list of supported channels is quite long, yet so is the one of not integrated TV streams. Nonetheless, the quality of the picture and sound is quite good. Moreover, you can add the ones you like most to a favorites list. This feature helps you customize

your list, by adding favorite channels and disposing of less wanted ones. It is also possible to mute the sound, place the video in a fullscreen mode, keep the original size or fit the window. Aside from that, you can hide the controls or menu bar, change the language and force the utility to always stay on top of all the others. Handy online TV tool All in all, Portable RevoluTV proves to be a useful piece of software, which enables

you to watch TV without a Tuner card or other additional products. It is friendly to your system's performance, has a good response time and intuitive environment. However, it could benefit from an update. Description: The Portable RevoluTV is a tool, that allows you to watch TV online without a Tuner card and a Desktop Application. It can handle several channels at once and is extremely lightweight. You can set

favorite channels, create a list of channels to be skipped and manage the volume and the subtitles.
