Problem: Execution plan of the query is too long (6 minutes) and it is used on the project with high level (99%) of concurrency (users are allowed to select only few records at the time). Problem cause: I'm a programmer not a DBA and even I can see, that execution plan of the query (cache?) is to long. What I tried: I'm using SQL Server 2012. I will start with three theories: There is something wrong with the table structure, because I tried to add index to the table. Problem is the table is a bit older and not that well optimized. Table has a trigger that inserts record when table is updated. This trigger is very long and has not indexes. There are too many temporary tables. What would be your theory? How can I optimize the query execution plan? Update: The query is (almost) the same, the only thing that I changed is one line of the query: FROM (SELECT *, SUM(prio) OVER (ORDER BY vers.id_seq) AS sumprio FROM dbo.version LEFT JOIN dbo.rapply ON dbo.version.id_seq = dbo.rapply.id_seq LEFT JOIN dbo.in_rev ON dbo.version.id_seq = dbo.in_rev.id_seq LEFT JOIN dbo.in_rev_cur ON dbo.in_rev.id_rev = dbo.in_rev_cur.id_rev LEFT JOIN dbo.dbo_no_id ON dbo.in_rev_cur.id_id = dbo.dbo_no_id.id LEFT JOIN dbo.dbo_no ON dbo.dbo_no.id = dbo.dbo_no_id.dbo_no_id WHERE dbo.in_rev.start_rev >= dateadd(day, -14, CURRENT_DATE) GROUP BY dbo.rapply.id_seq, dbo.version.ver, dbo.in_rev.start_rev, dbo.in_rev.start_date, dbo.in

Other: *** Requirements: Uncharted3 (Classic) Uncharted: Drake's Fortune Uncharted 2 Fiji (or equivalent) Package includes:
●Uncharted 3 - Nuketown ●Uncharted 3: Drake's Deception ●Uncharted 4: A Thief's End ●Uncharted: The Nathan Drake
Collection ●Uncharted: Nathan Drake Collection Remastered ●Uncharted 2 ●Uncharted
