Download raz-ez-et-farsi offline Farsi to write, read and convert it into Arabic language in popular mobile phones..Lymphatic endothelial cells do not support the growth of DCIS by activating T cells. The tumor microenvironment can provide signals that enhance growth and metastasis in cancer. Lymphangiogenesis has been shown to support the growth of breast cancer. The functional importance of dendritic cells (DC) in the lymphatic pathway is uncertain. The aim of this study was to investigate the involvement of lymphatics in DCIS progression. We hypothesized that DCIS cell-derived interleukin-6 (IL-6) may induce the formation of new lymphatics, thus supporting the growth of DCIS by enhancing the survival and migration of DC. Cells expressing green fluorescent protein (GFP) were co-cultured with activated/cytotoxic T lymphocytes (T cells) in both direct contact (DCIS-T) and noncontact settings (DCIS-T+RPMI). The growth of DCIS cells was evaluated by cell count and confocal microscopy. Significant proliferation was observed in the DCIS-T group compared with the DCIS-T+RPMI group. We used a 'Zonal Localization' approach using confocal microscopy and immunohistochemistry. This study was novel in that we combined data from
