GAMEPLAY These fundamental gameplay advances feature in FIFA 22: Touchdown physics In FIFA, you make a connection with the ball by pressing a button in the right moment. At the same time, you see a yellow pad snap up around the ball to make contact with it. In FIFA 22, EA has added more realistic, live-like action. Now, when you press the button, the yellow pad will snap up around the ball, making the ball feel more similar to a ball in actual play. In addition, you now make contact with the ball by pushing it. This provides a more natural touch on the ball and feels closer to a real game, where you would push the ball after receiving a pass. Assist Pass Assist passes are a key part of the game. You pass the ball into a teammate, and they work on it so they can score a goal or create a chance for another teammate. EA adds to this gameplay by adding a new assist pass feature. Ass bc9d6d6daa
