Determine its "constant acceleration and travel time" 12-3. A baseball is thrown down from a tower about 3 m high with an initial velocity of 18 fps. At what time of throw will he return to the ground? Solution. 1. A body thrown with a certain initial speed has a constant speed at the end of the movement. Substitute this speed into the expression for gravity, which we derived in the previous paragraph for the speed of the body at the moment of separation from the arm. According to the condition, the speed of the ball at the moment of separation is 18 fps, that is, $18x = 90 = 180 - mv$. Let's calculate the force of air resistance, which should act on the ball, and find its acceleration.
